

## Join the Team - "We Want to Help"

We know so many of you want to help. In addition to reaching out to check on others, there is a real need that many of you can help with...making masks.

There is a local effort called "*We Want to Help*," that Craig Pickering leads. The folks who join this team will be helping the recipients - including VIM, The Seabrook, doctors' offices, people who need masks at home - and more - helping folks right here in our own community.

If you can sew (even by hand), and want to join these efforts, send an email to [asiebold@fpchhi.org](mailto:asiebold@fpchhi.org) and share your interest with Andrea.

Once you sign up, a bag will be delivered to your home, including a sample mask, the required material for as many as you want to make, and a link to a video that shows step-by-step how to make them.

When you have finished, a member of the team will stop by for the masks - from your porch (abiding by physical distance, of course).

P.S. WE NEED FABRIC - cotton or muslin. If you have fabric to donate, please contact [asiebold@fpchhi.org](mailto:asiebold@fpchhi.org).
